Product Change Notification

Type: Advanced Product Change Notification
 Product Change Notification

Date: Nov. 8, 2022

PCN Number: PCN-22-04

Subject: MSOP Isolator and Sensor Products.

NVE part numbers affected:

- MSOP isolators
(IL510-1E, IL511-1E,
IL610x-1E, IL611x-1E,
IL710x-1E, IL711x-1E, IL712x-1E,
IL810T-1E, and IL811T-1E).
- MSOP sensors (all sensors with a “-00” suffix).

Description of change: Discontinuation of tube packaging in favor of tape and reel only.

Effective: Immediately.

Reasons for the change:

- Customer demand for tube packaging is dwindling because tape and reel is faster, avoids orientation errors, and reduces loading time.
- Tape-and-reel packaging is less susceptible to bent pins in our production process, especially for small surface-mount packages such as MSOPs. Bent pins can cause unreliable soldering.

Datasheets:

Datasheets that include MSOP parts will be updated to show tape-and-reel availability only the next time the datasheets are changed.
