

CHANGE NOTIFICATION

Notification Date: October 1st, 2016

Notification number: S201609003

To our valued customers:

Effective on January 1st, 2017, Kingbright will introduce a change to its label in an effort to enhance the product traceability during material handling and manufacturing process, and more importantly, to align this new barcode label (see below) with industry accepted practices. The change shall be identified by the QC date code on the label as of the effective date. However, due to the safety inventory at Kingbright's warehouse and at its authorized distributors, products shipped with older labels (before change) may be found within the shipping package(s) until the on-hand inventories are exhausted.
